Bonnet Crown
Cut 1 on fold

Materials: 3/4 yd of cotton fabric, 1/8 yd of 22" heavy interfacing, 1/2" elastic, thread

Lay out the pattern according to diagram. Cut and interface and transfer all markings

NOTE: See using 1/4" seam allowances

Bonnet Brim
1. Sew or fuse interfacing to wrong side of bonnet brim. With right sides together, sew bonnet brim along curved edge leaving straight edge free. Turn right side out. Press. Top stitch 1/4" from finished edge.

Crown
2. Using a long stitch, sew a gathering stitch between notches a 1/4" from raw edge. With wrong sides together, press up along crown foldline. Now turn right sides together along fold, and sew a 1/4” seam to symbol. Clip to stitching. Turn right sides out. Press. Sew a casing as indicated on pattern. Using a safety pin, insert elastic into casing. Stitch across the raw ends to hold elastic in place. With the right sides together, pin the crown to the brim, gathering up the crown to matching center backs and notches. The end of the brim should be even with the clipped end of the crown. Sew in place.

Ties
3. With right sides together, sew ties along the pointed and long edge. Turn. Press. Sew ties to bonnet brim and crown at the location of the elastic.
